SUMMARY

Final-year BCA student and full-stack developer with hands-on experience building production-ready MERN stack applications. Completed two internships - Frontend Developer at CNE Associates (May–Jul 2025) and Full Stack Developer at Solvimate (Oct 2025–Apr 2026). Passionate about building scalable, user-centric platforms. Actively seeking full-time developer or internship roles.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3

Frontend: Next.js 15, React.js, Tailwind CSS, Framer Motion, GSAP

Backend: Node.js, Express.js, REST API Design, JWT Auth, Zod, bcryptjs

Databases & Infra: MongoDB, Mongoose, PostgreSQL, Drizzle ORM, Cloudinary, Vercel, Render

CMS & Design: WordPress, Figma, UI/UX Design, Wireframing, Prototyping, Design Systems

Core Concepts: Data Structures & Algorithms, REST API Design, System Design

EXPERIENCE

Full Stack Developer Intern

Oct 2025 – Apr 2026

Solvimate

Remote

- Built and shipped production-ready features across the full stack for a MERN stack product (Teja project).
- Integrated React components with Express.js REST APIs using Axios, handling auth flows and data rendering.
- Owned frontend architecture decisions including folder structure, component patterns, and state management.
- Collaborated with the backend team to define API contracts, data shapes, and request/response schemas.

Frontend Developer Intern

May 2025 – Jul 2025

CNE Associates Private Limited

Remote

- Built scalable frontend components using Next.js and Tailwind CSS for deployed web applications.
- Developed and integrated REST APIs, handling data flow between frontend and backend services.
- Automated data workflows using Google Apps Script and Google Sheets, reducing manual processing time.
- Assisted in backend development tasks and contributed to improving overall system performance.

PROJECTS

DevXClub | *Next.js 15, Express, MongoDB, Turborepo, JWT, Framer Motion*

[GitHub](#) | 2026

- Full-stack Turborepo monorepo with Next.js 15 App Router frontend, Express.js REST API backend, and shared TypeScript packages.
- Implemented Cloudinary file uploads with CDN delivery, MongoDB Atlas storage, and animated UI with Framer Motion.
- Built role-based access control, protected routes, and JWT session management across frontend and backend.
- Managed CI/CD with Vercel (frontend) and Render (backend); maintained git workflow with feature branches and PR-based merges.

InkFlow | *React, Vite, Express.js, PostgreSQL, Drizzle ORM, TypeScript*

[GitHub](#) | 2026

- Built a full-stack Medium-inspired blog platform with article CRUD, drafts, rich reading view, and interest-based discovery feed.
- Implemented social features: claps, comments, bookmarks, follows, tags, full-text search, and trending articles.
- Engineered session-based auth with SHA-512 + per-user salt, timing-safe comparison, and httpOnly secure cookies.
- Added onboarding topic picker for new users and full dark/light mode with responsive animated UI.

Tenar.in | *React, TypeScript, Vite, Tailwind CSS, React Router v6, Zod*

[GitHub](#) | 2025

- Built a 7-step signup/onboarding wizard for an exporter onboarding platform with JWT auth.
- Used react-hook-form with Zod for end-to-end type-safe form validation across all onboarding steps.

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Veer Bahadur Singh Purvanchal University

Varanasi, India
